

DLF GRAZER

A specialist grazing mixture put together with our latest genetics based on the PPI and actual grazing trials.

- Xenon is the best performing variety on the Teagasc grazing trials
- Bowie is an ultra-late variety, new to the PPI for 2021
- Nashota has an excellent PPI value of €200
- All varieties head by May/June giving a prolonged window of high quality

A specialist grazing mixture put together with our latest genetics based on the PPI and actual grazing trials.

Bowie is a brand new, ultra-late heading variety giving prolonged quality well into June.

DLF Grazer contains a mixture of Diploid and Tetraploid varieties ensuring high yield, quality and excellent grazability.
