

# DLF Herbal Ley 14 Species

A specialist multi-species mixture from DLF

What DLF 14 species herbal Ley can offer

- Enhanced root structure gives even better nutrient use efficiency and makes this mixture suitable for a range of conditions from heavy soils to drought conditions
- Boosted mineral and trace element content from herbs like yarrow, burnet and parsley
- Compounds in sainfoin and birdsfoot trefoil can reduce the risk of bloat and are natural wormers

For more information check out our [Multi-Species focus site](#)

## Why sow multi-species

- Multi-species swards can produce similar DM yields to perennial ryegrass swards at significantly lower rates of inorganic N fertiliser. This could be worth up to 6 bags CAN/acre per year.
- Multi-species swards are a source of highly digestible, high protein forage and can maintain their high quality throughout the growing season.
- The inclusion of legumes and mineral-rich herbs provides a more balanced diet than a grass sward with species like chicory also providing some anthelmintic benefits to grazing livestock.
- Deep-rooting legumes and herbs make multi-species swards more resistant to drought conditions.
- Suitable for dairy, beef and sheep enterprises.

Available in 12KG Bags

GRAZING		
13%	Nifty	Perennial ryegrass
13%	Xenon	Perennial ryegrass
7%	Timothy	Timothy Blend
7%	Meadow Fescue	
10%	Chicory	
10%	<b>Plantain</b>
